MEDIA ADVISORY

July 16, 2008

Bakersfield, CA Vincent Redmond, MA, MFT, Regional Director of Center for Autism and Related Disorders, Inc will appear on the #1 rated television morning news show in the central valley of California, **KGET – NBC, Friday, July 18, 2008**. Redmond will speak live on the show to talk about the film ***Recovered: Journeys Through the Autism Spectrum and Back***, the services CARD provided to the four children the film is based on, and the role he played in recovering one of the four children.

Redmond, who is featured in the film, will also serve as Master of Ceremony for the Bakersfield, California screening of ***Recovered: Journeys Through the Autism Spectrum and Back***, held at The Nile Theater, 1721ST 19TH Street, downtown Bakersfield.

Redmond's live appearance is this Friday, July 18 on KGET-NBC (Bakersfield, CA), starting at 6:20am. The segment will later be accessible via www.centerforautism.com.

Recovered: Journeys Through the Autism Spectrum and Back is a true and inspiring story of four families who were driven by hope, and one organization that helped them overcome the odds. The film takes you along the journey of four autistic children, their struggles, and their triumphs as they recover from autism. The film proves that recovery from autism is possible.

"Many people don't believe it is possible to recover from Autism. Our intention in providing proof of Recovery and in identifying a course of action toward that goal is only to bring hope and determination to those families who feel it is in the best interest of their child to learn new skills in order to better access the rewards of life.

We feel every child has the right to be healthy, to be taught the skills they need to interact appropriately with their peers and to be allowed to demonstrate their strengths, instead of fight their weaknesses. We feel confident we have found the path to make this a reality." Dr. Doreen Granpeesheh, one of the nation's leading autism researchers and psychologists, and Executive Director of CARD.

The Center for Autism and Related Disorders, Inc., headquartered in Tarzana, California is among the world's largest and most experienced organizations effectively treating children with autism and related disorders. CARD operates through 17 satellite national and international offices. CARD has treated thousands of children around the world. Its services include assessments, supervision, parent/teacher training and one-on-one applied behavioral therapy. CARD was established in 1990 by Dr. Doreen Granpeesheh, Ph.D., BCBA.
