## Why an Autism Seminar?

Family Time Magazine will host their 1st annual Autism Seminar on November 21st, 2009 at Governors State University. A strong interest in autism has made this event come to serve families. Seven or more specialized speakers will cover a wealth of information. These speakers are experts in many different areas of children with special needs.

Some categories that will be covered are speech therapy, diagnosing autism, levels of Autism, what to do when your child is diagnosed, and where to go from there. Seminar will include, new and developing programs, networking for parents, strategies for coping, activities for children with special needs, special diets for Autism, and how to fight autism. It is our goal to bring parents the opportunity to meet face to face with these experts. Family Time's **mission** is to enhance the lives of families with special needs, one day at a time. Here is how your great organization can get involved now!
