

Center for Autism and Related Disorders Opens Six New Treatment Centers

CARD now has over 190 centers across the nation providing services based on the CARD Model to families affected by autism.

WOODLAND HILLS, Calif. ([PRWEB](#)) April 25, 2018 -- Center for Autism and Related Disorders (CARD) today announced the opening of six new treatment centers, which will join its expansive network of locations across the United States. CARD is the premier leader in the field of autism treatment and specializes in using the principles of applied behavior analysis (ABA) to treat individuals of all ages diagnosed with autism spectrum disorder (ASD). The new centers are located in Bayside, NY; Crystal Lake, IL; Franklin Square, NY; Grand Rapids, MI; Tucson, AZ; and Vacaville, CA. CARD provides individualized services in its centers and in the patient's home, school, and/or work settings. CARD also offers diagnostic and assessment services and social skills groups for individuals of all ages with ASD.

“CARD is committed to meeting the needs of the autism community, and each of these clinics represents hundreds of families who now have access to top-quality treatment,” said Doreen Granpeesheh, PhD, BCBA-D, founder and executive director of CARD. “We are privileged to play a role in ensuring individuals affected by autism have the services they need in order to maximize their potential.”

The six new centers are a part of a network of over 190 centers that provide services based on the CARD Model developed by Dr. Granpeesheh. Dr. Granpeesheh has dedicated more than 30 years to helping individuals with autism fulfill their potential and lead healthy, productive lives. Since its founding in 1990, CARD has helped thousands of individuals affected by autism and their families access the services and supports they need.

For more information, the new centers can be contacted directly at the following phone numbers:

- Bayside: (347) 321-4094
- Crystal Lake: (779) 220-6262
- Franklin Square: (516) 865-1142
- Grand Rapids: (616) 278-1201
- Tucson: (520) 526-0050
- Vacaville: (707) 305-1118

For street addresses and manager contact information for all CARD centers, please visit <http://www.centerforautism.com/locations.aspx>.

The Centers for Disease Control and Prevention (CDC) estimates that one in every 68 children in the U.S. is diagnosed with ASD, with one in 42 boys and one in 189 girls diagnosed. These 2014 figures represent a 30 percent increase since 2008. As the prevalence of ASD has increased, services for individuals with ASD have not always kept pace with demand. As a result, families affected by ASD may encounter challenges when trying to access quality treatment. The increase in autism diagnoses and the lack of resources available to families in many communities leave parents struggling to access the services that are crucial to their child's development.

CARD strives to meet the growing need for services by continuously opening new centers throughout the country to provide top-quality ABA therapy across all populations. As a result of its unprecedented growth,

CARD is hiring entry-level and experienced clinicians and administrative staff at many of its locations. To explore a rewarding career in the field of autism treatment, visit <http://www.centerforautismjobs.com>.

About Center for Autism and Related Disorders (CARD)

CARD treats individuals of all ages who are diagnosed with autism spectrum disorder (ASD) at treatment centers around the globe. CARD was founded in 1990 by leading autism expert and clinical psychologist Doreen Granpeesheh, PhD, BCBA-D. CARD treats individuals with ASD using the principles of applied behavior analysis (ABA), which is empirically proven to be the most effective method for treating individuals with ASD and recommended by the American Academy of Pediatrics and the US Surgeon General.
